

# CORRY PAVING PROJECT, ERIE COUNTY

## PROJECT DESCRIPTION

The purpose of the project is to provide reliable and efficient transportation facilities for all users traveling on in the City of Corry by making improvements:

- Route 77 (West Main Street/Union Street) between the intersection with W Church St. and the intersection with Route 426.
- Route 426 (East Main Street and North Center Street) from the Warren County line to the intersection with Route 6.
- W. Washington Street (Route 2020) from the city line and the intersection with Route 426.
- S. Center Street (Route 2029) from the line and the intersection with Route 426.

Work will vary on each roadway and will include full-depth pavement replacement, paving, milling, sign and line painting updates, drainage upgrades, and bicycle and pedestrian safety improvements.

## ROUTE 77

Improvements are proposed Route 77 (West Main Street/Union Street) between the intersection with W. Church Street and the intersection with Route 426. The project area is urban and surrounded by residential properties and industrial areas. The average daily traffic (ADT) on Route 77 is approximately 3,300 vehicles per day with 11% truck traffic.

Proposed work includes the following:

- Full-depth reconstruction (full concrete and asphalt removal and new subbase and asphalt layers).
  - Phase 1 from First Avenue to Mead Avenue.
  - Phase 2 from Mead Avenue to Church Street.
- Milling and paving from Center Street to First Avenue.
- Guiderail replacement.
- Drainage upgrades.

**PROPOSED TRAFFIC IMPACTS** – Reconstruction work on Route 77 will require a detour, which is expected to be in place for six months. The proposed 35-mile detour uses Route 77, Route 8, Route 6, and Route 426. When the detour is not in place, motorists may encounter lane restrictions with traffic controlled by flaggers.

## ROUTE 426

Improvements are proposed Route 426 (East Main Street and North Center Street) from the Warren County line to the intersection with Route 6. The project area is urban and surrounded by local businesses, residential properties, and industrial areas. The average daily traffic (ADT) on Route 426 is approximately 6,200 vehicles per day with 7% truck traffic.

Proposed work includes the following:

- Milling and paving.
- Base repairs.
- Sign and roadway paint updates.
- Railroad cross upgrades.
- Installation of Share the Road signs and pavement markings.
- ADA-compliant curb ramp installation.
- Drainage upgrades.

**PROPOSED TRAFFIC IMPACTS** - An approximately one-week detour is proposed for work near the Center Street railroad crossing. The proposed detour uses the same path as the proposed Route 77 detour. Pedestrian detours may be needed during curb ramp construction. Additionally, motorists may encounter lane restrictions with traffic controlled by flaggers.

## W. WASHINGTON STREET AND S. CENTER STREET

Improvements are proposed to W. Washington Street (Route 2020) from the city line and the intersection with Route 426 and S. Center Street (Route 2029) from the line and the intersection with Route 426. The project area is urban and surrounded by residential properties and industrial areas. The average daily traffic (ADT) for W. Washington Street is approximately 1,200 vehicles per day with 8% truck traffic. The average daily traffic (ADT) for S. Center Street is approximately 1,500 vehicles per day with 2% truck traffic.

Proposed work includes the following:

- Milling and paving.
- Base repairs.
- Drainage upgrades.
- Sign and roadway paint updates.
- ADA-compliant curb ramp installation.

**PROPOSED TRAFFIC IMPACTS** - Motorists may encounter lane restrictions with traffic controlled by flaggers.

## ANTICIPATED CONSTRUCTION SCHEDULE

The construction is expected to be completed in one construction season. Work will be coordinated between the full-depth pavement reconstruction on Route 77 and the milling and paving planned throughout the project. Efforts will be made to minimize work on W. Washington and S. Center streets while detours are in effect for Route 77 and the grade crossing on Route 426.

The anticipated project schedule includes the following:

- Contract bid opening – October 2025.
- Construction start date – April 2026.
- Route 77 open to traffic – September 2026.
- Construction completion date – October 2026.

## CONSTRUCTION FUNDING

This project will be funded entirely with federal funds. The estimated construction cost is \$5 million to \$7.5 million.

## CURRENT PUBLIC COMMENT PERIOD

The purpose of the public comment period is to introduce the project and receive input regarding any questions or concerns with the project. It is also an opportunity for the public to review and comment on the project's potential effect upon Cultural Resources pursuant to the Advisory Council on Historic Preservation's 36 CFR Part 800 regulations implementing Section 106 of the National Historic Preservation Act. The project documents can be made available in alternative languages or formats if requested.

Comments and questions can be submitted to PennDOT Project Manager Chris Boyer-Krantz, at [chboyer@pa.gov](mailto:chboyer@pa.gov), 814-678-7379, or 255 Elm Street, Oil City, PA 16301. An online comment form can be accessed by visiting [www.penndot.pa.gov/District](http://www.penndot.pa.gov/District) clicking the [Projects Near You](#) and the [District 1](#) link and finding the project within the Erie County section.
